

Find out if this deadly mold is inside your home

Hi [Customer Name],

Just want to give you a quick heads up that Summer is fast approaching and is known as the worst season for black mold.

Did you know that black mold is more common in your state than most people think? Breathing in black mold can cause respiratory problems; chronic coughing, sneezing, and irritation of the mucus membrane of the nose, throat, and eyes. Black mold poisoning causes severe skin rashes, chronic fatigue, persistent headaches and -- in some cases -- even death.

We want to ensure that you are protected in your home and that your home is safe to live in.

Here are some expert tips to help you avoid black mold in your home.

HOW TO AVOID BLACK MOLD

- Immediately dry wet areas
- Clean infected areas with baking soda and vinegar
- Proper ventilation prevents moisture build up
- Direct water away from your house
- Clean or repair roof gutters
- Improve the flow of air in your home

How to know if **black mold** is growing in your home? **Follow your nose.** Does the air in your home smell like dirt, earthy or musty, like rotting leaves? If so, this is a telltale sign of the presence of **black mold**.

One more thing: Mold spores spread easily and can be **very** difficult to remove.

If you think there is black mold in your home, do not try to fix it yourself, call a certified mold specialist immediately.

Right now, we are offering a free inspection to the first 15 people who reply to this email.

One of our black mold specialists will come to your home **FREE** of charge, to make sure that you and your family are 100% safe. **NO STRINGS ATTACHED.**

Click [here](#) or call 1-800-555-555 now to schedule your free inspection.

Best regards,

The [Company Name] Team

P.S. Remember, this limited time offer of a free inspection is available to only **15** people. So, please respond quickly as it is **first come, first serve.**
